SUMMARY

Detail-oriented Electronics and Communication Engineering graduate with a strong foundation in Data Analytics, Business Intelligence, and Reporting. Hands-on experience with the full analytics workflow — data cleaning, exploratory data analysis (EDA), statistical trend analysis, dashboard design, and visualization — using Python, SQL, and Power BI. Seeking an entry-level Data Analyst / Business Intelligence role to apply strong analytical and problem-solving skills to real-world data.

CORE COMPETENCIES

Data Analysis • Data Visualization • Exploratory Data Analysis (EDA) • Dashboard Design & Reporting • Data Cleaning & Transformation • SQL Querying • Business Intelligence (BI) • Statistical & Trend Analysis • Problem Solving

TECHNICAL SKILLS

- **Programming & Querying:** Python, SQL
- **BI & Visualization:** Power BI, Power Query, Excel, Dashboard Design, Data Visualization
- **Python Libraries:** Pandas, NumPy, Matplotlib
- **Data Skills:** Data Cleaning, Data Transformation, Trend Analysis, EDA, Problem Solving

PROJECTS

Netflix Data Analytics Dashboard | Power BI, Power Query

- Built an interactive Power BI dashboard analyzing an 8,808-title Netflix content library across 13 data fields (genre, cast, country, release year, rating, duration), surfacing content and trend insights.
- Used Power Query to clean and transform raw data — handling nulls and splitting multi-value fields such as cast and genre — prior to visualization.
- Designed multiple interactive report pages covering genre distribution, country-wise content trends, and release-year patterns for quick insight discovery.
- [GitHub: github.com/Preetha-data-analyst/netflix-data-analysis](https://github.com/Preetha-data-analyst/netflix-data-analysis)

Zomato Data Analysis | Python, Pandas, NumPy, Matplotlib

- Performed exploratory data analysis on a 51,717-row Zomato restaurant dataset (18 attributes, ~7.1 MB) using Python to uncover patterns in cuisine, cost, and customer ratings.
- Cleaned and preprocessed raw data with Pandas and NumPy, handling missing values and inconsistent formatting to improve dataset reliability.
- Built visualizations with Matplotlib to analyze rating distribution, cost-for-two trends, and cuisine popularity, and to compare restaurants offering online ordering versus table booking.

TRAINING

QSpiders — Python with Data Analytics Training | Jan 2026 – May 2026

- Completed structured, instructor-led training in Python, SQL, Power BI, and analytical aptitude as part of a comprehensive Data Analytics program.
- Built practical proficiency in Pandas, NumPy, and Matplotlib through hands-on, Python-based data analysis exercises.
- Applied program concepts end-to-end — from data preparation through analysis and visualization — to independently build the Zomato and Netflix projects above.

EDUCATION

B.E. in Electronics and Communication Engineering | 2022 – 2026

Bangalore Technological Institute, Bengaluru — Visvesvaraya Technological University (VTU) | CGPA: 8.0/10

CERTIFICATIONS

- Python for Beginners — Simplilearn
- SQL — Simplilearn
- Power BI for Data Modelling — Simplilearn
- Cloud Fundamentals — EXCELR Raising Excellence

ACHIEVEMENTS

- Secured 3rd place in an Ideathon competition.
- Secured 2nd place in a Building Robot and Robo Race competition.

LANGUAGES

Tamil, Kannada, English
